## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-9 and 12-16 are allowed over the prior art of record.

### *Reasons for Allowance*

2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither teach nor render obvious the instant application claimed invention as a whole, in particular, the prior art fails to teach "a pattern of electrical conductors for electrically coupling the component to other components and/or contact means for external coupling, at least one of which electrical conductors extends into the body and is electrically coupled to a further conductor that is embedded in the body and is at least partially exposed to a surface of the body, wherein the body only partially surrounds the side portions of the electric component, as recited claim 1.

Claims 2-9 and 12-16 are also allowed as being directly or indirectly dependent of the allowed base claim 1.

*Relevant Art*

3. Mandler et al. (7,084,935 B2) teaches A display device is disclosed having a base member adapted to receive at least one light device, conductive layer provided on the base member and configured to electrically interconnect with the light device, and a light guide member integrally formed on one or more of the base member and conductive layer, and having at least one aperture configured to at least partially surround the light device. A method of making a display device is also disclosed and includes the steps of providing a base member having a conductive layer provided in a pattern thereon, forming a light guide member having at least one aperture onto at least one of the base member and the conductive layer, and attaching at least one LED to the conductive layer so that the LED is disposed within the aperture.

*Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure Ikuta et al. (US 2003/0169575 A1) and Rohrbacher et al. (2004/0011944 A1).
